EXPERIENCE

- Service Desk Engineer** · CDMA Services Ltd., NicosiaSep 2026 – Present
 - Level 1 support across multiple client organisations, handling 5–10 tickets a day from triage and troubleshooting through vendor coordination and escalation.
 - Microsoft 365 and Entra ID administration: user lifecycle, licensing and access.
 - Daily work in the Kaseya stack: Autotask PSA, IT Glue and Datto RMM.
- Freelance Developer** · Self-employed, part-timeOngoing
 - Take on occasional side projects for clients, mainly web apps and AI agents that automate workflows.
- Co-Lead & Core Team Developer** · Google Developer Group, Harokopio UniversitySep 2023 – Jul 2025
 - Grew a dormant chapter from 5 to 50 members and ran monthly hands-on security workshops.

EDUCATION

- Master of Engineering, Cybersecurity** · University of Limerick, IrelandSep 2025 – Aug 2026
 - Thesis (grade A2): SONDA-MA, a lightweight mutual-authentication protocol for RFID/NFC tags, written in C and formally verified with ProVerif.
- BSc Informatics & Telematics** · Harokopio University, GreeceOct 2021 – Jul 2025
 - Thesis (graded 10/10): COVSAW, a static analyser that detects cryptographic misuse in Python code.

SKILLS

Programming	Python, Bash, C, C++, Java, TypeScript/JavaScript, SQL
Frameworks	React, Next.js, Node.js, FastAPI
DevOps	Docker, Ansible, Jenkins, Azure, Linux, Git
Security	SIEM (ELK, Splunk), MITRE ATT&CK, SAST (Semgrep, Bandit), dependency & secret scanning, Burp Suite, Nmap, Wireshark, GDPR
AI & Automation	Claude Code, Claude & OpenAI APIs
IT Operations	Autotask PSA, IT Glue, Datto RMM, Sophos, networking (TCP/IP, DNS, VPN)
Certifications	Sophos Certified Endpoint Engineer (2026), Sophos Workspace Protection (2026), Kaseya: Datto RMM, Autotask PSA, IT Glue
Languages	Greek (native), English (fluent)

PROJECTS

- DevSecOps Pipeline Scanner**
[Python](#) · [FastAPI](#) · [OSV.dev](#) · [GitHub Actions](#) · [Docker](#)
 - CI/CD security gate that checks dependencies across four ecosystems for known CVEs, detects hard-coded secrets, and fails the build above a set severity.
- Zero Trust Identity Dashboard**
[Node.js](#) · [Express](#) · [Next.js](#) · [JWT](#) · [SQLite](#) · [Docker](#)
 - Default-deny access control that checks role, time of day and source IP on every request, with JWTs kept out of the browser in httpOnly cookies and every decision written to an audit log.

More projects, covering cloud auditing, threat detection, CI/CD delivery and applied cryptography, are documented in detail on [GitHub](#) and on my portfolio at [gnicolaides.vercel.app](#).
